

HEWLAND UPB 75w140 LS

DESCRIPTION:

Competition heavy duty fully synthetic transmission oil for highly stressed applications with friction modifiers for limited slip differentials. Incorporates "Nano Technology" additive chemistry to significantly reduce internal frictional and power losses, whilst providing additional shock protection to the gear mechanism.

APPLICATION:

Designed for the lubrication of final drives which are subject to high stresses or arduous applications, such as long distance racing or rallying on very high power and torque outputs. Hypoid differentials with limited slip, gearboxes with combined limited slip differential, synchromesh and non-synchromesh manual gearboxes, transaxles and transfer boxes.

USER BENEFITS:

- Friction-modified transmission oil specially formulated to give smooth lock up, minimal chatter and optimum performance.
- Good cold flow properties for easier gear changes.
- Very good oxidation resistance and superior thermal stability.
- The incorporation of NT additives provides outstanding protection to dog rings and gears, whilst low friction formulation helps reduce operating temperatures.
- Significantly reduces friction, temperature, wear and minimises power loss.
- Proven solution to transmission problems in high performance rally cars

PERFORMANCE PROFILE EXCEEDS:

API GL4

API GL5

API MT-1

MIL-PRF-2105E

TYPICAL CHARACTERISTICS:

SAE viscosity grade	75w140	Specific gravity at 15°C	0.892
Kinematic viscosity at 100°C	24.2cSt	Kinematic viscosity at 40°C	176.7cSt
Viscosity index	177	Brookfield Viscosity @ -40°C	97890mPas
Colour	Blue
