

# PRODUCT DATA SHEET

## PRODUCT NAME/VISCOSITIES:

### **MILLERCARE HW (formerly) ANTIFOAM HW 2217**

Product No	5566
Issue No.	2
Issue Date	17/03/14

## DESCRIPTION:

Developed specifically for use in water based semi-synthetic and synthetic cutting and lubricating fluids.

## APPLICATION:

To be incorporated directly into the majority of water based cutting fluids with simple agitation. Typical concentration for use is 1 litre treats 1000 litres of coolant.

Avoid over application which can cause visible hard water scum.

## USER BENEFITS:

- Excellent solubility characteristics in the cutting fluid concentrates.
- Prolonged storage stability without loss of efficiency.
- Retains highly efficient foam control action in diluted cutting fluids.
- No effect on emulsion characteristics of cutting fluid.
- Free from Silicones

## TYPICAL CHARACTERISTICS:

Specific Gravity @ 20°C	approx. 1.000
Appearance:	Water white liquid
Odour:	Mild

## HEALTH AND SAFETY:

Health and Safety Data Sheet 5566 applies to this product. When used for the purpose recommended and with due regard to the appropriate Health and Safety Data, the product should cause no concern. If in doubt, consult with Millers Oils Technical Department.
