## MILLGEAR SY RANGE

The Millgear SY range are fully synthetic, polyalkylene glycol (PAG) extreme pressure industrial gear lubricants.

### Application

Use as received for a wide range of industrial gears, oven conveyor chains, tenters, stenters and applications with elevated temperatures.

Note: This lubricant should not be mixed with mineral oils, when changing over from mineral based products, flush the system with the suitable Millgear SY product.

### Features & Benefits

- Performs at elevated temperatures, typically in excess of 200C.
- High viscosity index imparts low start up drag whilst maintaining optimum viscosity at operating temperature.
- Low oxidation leads to extended oil life, typically 10,000 hours @ 100C.
- Excellent Corrosion protection of yellow and ferrous metals.
- David Brown type G general approval.
