

# PRODUCT DATA SHEET

## PRODUCT NAME/VISCOSITIES:

### Diesel Particulate Filter Cleaner & Regenerator

Product No	7795
Issue No.	3
Issue Date	26/02/20

#### DESCRIPTION:

A one shot diesel additive designed to clean Diesel Particulate Filters (DPFs) reducing the regeneration temperature required to allow the trapped soot particles to be burnt off. Ensures a cleaner more efficient DPF. This diesel fuel treatment is suitable for vehicles fitted with AdBlue aftertreatment systems.

#### APPLICATION:

By addition to the fuel tank prior to refueling. One 250ml bottle treats 60 litres of fuel as a preventative measure, approximately every 2,000miles (3,000kms) Can be used more frequently if DPF blocking is a regular problem.

**Storage Instructions: Avoid strong direct light and heat.**

#### USER BENEFITS:

Short trips and stop start driving will mean lower exhaust gas temperatures and the regeneration of the DPF will not take place leading to blocking by trapped particulate matter. The engine will become inefficient and in some cases the warning light will come on requiring immediate action. The product provides:

- One shot treatment for fast results without the expense of dismantling or renewal.
- Lowers the temperature of regeneration assisting the removal of trapped soot particles.
- Cleans the DPF, providing optimum fuel economy, reducing emissions and restoring engine power.
- Highly suitable where short trip stop start driving is the norm.

#### TYPICAL CHARACTERISTICS:

Specific Gravity @ 15°C      0.810  
Flashpoint °C                      75

#### HEALTH AND SAFETY:

Health and Safety Data Sheet 7795 applies to this product. When used for the purpose recommended and with due regard to the appropriate Health and Safety Data, the product should cause no concern. If in doubt, consult with Millers Oils Technical Department.
