EE Performance: Extraordinary Performance. Every Day.

EE Performance from Millers Oils is the "track day ready", fully synthetic high performance engine oil for on-road use. Using award-winning, low-friction NANODRIVE technology and ester chemistry, EE Performance delivers maximum engine performance whilst meeting manufacturers' specifications and recommended oil drain intervals.

NANODRIVE

Low Friction Technology

Originally developed for professional motorsport applications, NANODRIVE is the award-winning low friction technology from Millers Oils. Incorporating advanced nanoparticle technology, NANODRIVE formulations reduce friction and wear in high performance applications where the oil film alone cannot be relied upon for lubrication. The EE Performance range reduces friction by up to 24% when compared to industry standard formulations, as shown in the graph below.
