“Millers Oils’ technical knowledge and experience means we have full confidence in their recommendations, and the training and condition monitoring provided has helped us to both extend coolant life and prevent unplanned down-time.” - Industrial Manufacturer

MILLERS OILS: AT A GLANCE

Founded in 1887, Millers Oils began its journey by formulating and supplying high-quality lubricants to the industrial sector—our original and flagship industry. Over the decades, we’ve evolved our blends alongside the industries we serve, maintaining unwavering commitments to:

- Innovation:** Pioneering advanced lubrication technologies.
- Quality:** Precision formulated products that exceed OEM standards.
- Service:** Going beyond supply to deliver expert support and tailored solutions.

At the heart of our innovation is expert formulation. Our products are built to thrive under extreme pressure and temperature conditions. They extend equipment life, reduce maintenance costs, and keep your operations running smoothly.

The additives in our blends are carefully selected to improve the oils’ performance. Our extensive range of products are designed to help combat industry challenges. It’s both a science and an art—balancing chemistry, engineering, and application-specific needs.

PROTECTED BY MILLERS OILS

It's not just about the products we blend — it's the expertise behind them. Millers Oils is more than a lubricant supplier — we're your strategic partner in performance and reliability. Our long-standing history provides deep knowledge, our production facilities ensure robust capability, and our dedicated team delivers unmatched expertise.

Whether you require occasional guidance or ongoing support, we're here to protect your machinery beyond the oil you're using.

What Sets Us Apart?

- We don't just sell oil—we engineer solutions and maintenance strategies
- Our technical team aligns with your equipment, goals, and performance standards
- All blending and testing is done on-site in Brighthouse
- We operate our own laboratory and R&D facilities
- We deliver nationwide across the UK and globally
- We support you through every step of your journey with us — from order to delivery, product integration and ongoing maintenance

COMPREHENSIVE FLUID MANAGEMENT SERVICE*

Fluid management plays a pivotal role in predictive maintenance—ensuring equipment reliability and performance. Millers Oils provides comprehensive, end-to-end solutions, from initial oil fills and high-efficiency filtration to routine oil analysis and condition monitoring. These services are meticulously designed to minimise contamination, safeguard lubricant integrity, and extend the service life of machinery. Our fluid management service includes:

- Initial oil fills and oil changes
- Oil analysis
- Oil filtration down to 1 micron
- Tank cleaning and water removal
- Sump clean-outs and waste oil disposal

Benefits

* For international enquiries relating to this service please contact us.

OIL SAMPLING: THE KEY TO PREDICTIVE MAINTENANCE

Avoid costly breakdowns with regular oil analysis. If the oil is left too long without an oil change it can cause wear and corrosion. Frequent oil sampling monitors the condition of the oil and allows maintenance to be planned around production—saving both time and money.

Our detailed sample reports include:

- Viscosity:** Viscosity is crucial for optimum lubrication, and can change due to contamination or oxidation.
- Additive level:** Additives such as anti-wear, anti-corrosion etc. become depleted over time as they fulfil their purpose in the oil.
- Contamination:** Oil can become contaminated by environmental factors such as water, dust and debris, as well as by other oils.
- Wear metals:** Wear metals in the oil offer an insight into not just the health of the oil, but the health of the machine components. High levels of a certain metal can indicate that a particular component may need replacing soon.

ON-SITE LABORATORY

Millers Oils on-site laboratory is central to our commitment to excellence, enabling oil analysis, product testing and innovative formulation.

Our Service Promise

We pride ourselves on exceptional quality and service. Every lubricant blended and manufactured at our production facility comes with a Millers Oils Quality Guarantee, backed by dedicated service support. We stand behind the performance and reliability of every product we produce. Our commitment to quality is built on rigorous testing, precision formulation, and decades of technical expertise. If any product recommended by our technical team fails to meet guaranteed specifications under normal operating conditions, we will replace it or refund your purchase.

LUBRICANTS ENGINEERED TO DRIVE YOUR BUSINESS FORWARD

Our comprehensive range of oils, greases, and treatments is engineered to keep your operations running smoothly. Designed to minimise downtime, boost efficiency, and extend the lifespan of critical equipment. Our products meet a wide array of industry specifications and performance standards. Below are some of the standout solutions we offer with various highlights within the range.

TYPE	RANGE	HIGHLIGHTS
Hydraulic Oil	Millmax Millfood	• Zinc-free • Biodegradable • Longlife • Synthetic • Fire-resistant • Food grade
Metalworking Fluids - Water Soluble	Millcool Millgrind	• Boron/formaldehyde/chlorine-free • Semi/fully synthetic
Metal Working Fluids - Neat Oils	Millform Dielectric Fluid Erosol Hobby Fluid	• Cutting • Forming • EDM • Honing • Boron/formaldehyde/chlorine-free
Mould Oil	Mould Oil	• Electrostatic spray options • Excellent separation
Slideway Oil	Millway	• Anti-wear • Corrosion protection • Tacky adhesive
Gear Oil	Millgear Millfood	• Food grade • Synthetic/mineral • Halal/Kosher
Turbine Fluid	Millbine	• Meets DIN 51515 Part 1 (L-TD) & Siemens TLV 9013 04. Gas and steam compliant
Compressor Oil	Millair Millervane Millfood	• DIN 51506 VD-L compliant • Synthetic (extended drain interval) • Vane compressor suitability • Airline oil • Food grade

TYPE	RANGE	HIGHLIGHTS
Chain Oil	Chain Oil Millfood	• Up to 250°C • Biodegradable • Food grade
Food Safe	Millfood	• Gear oil • Hydraulic oil • Food grade • Halal/Kosher
Greases	Millergrease Delta, Millfood	• Food grade • EP • Silicone • Non-melt • Graphite paste • Wire rope
Rust Preventatives	Millertect Rust Preventatives	• Dewatering • Corrosion inhibitors
Quench Oil	Millquench	• Accelerated quenching • Solvent refined
Gas Engine Oil	Millgas	• High temperature • Detergent/dispersant • Biodegradable
Textile Oils	Soakol Sewing, Knitting	• Yarn lubricant • Needle/knitting and sewing machine lubrication
Transformer Oil	B30	• Hydrotreated naphthenic oil
Cleaners & Ancillaries	Millercare, Milliclean Heat Transfer Oil Millawhite Confectol Millube	• Solvent-free • Sludge removal cleaner • Refined technical white mineral oil • Wire rolling/drawing and general purpose lubrication

All product ranges have varying viscosity grades. For our full up to date specifications for each product please visit www.millersoils.co.uk.

TECHNICAL SUPPORT & CONSULTATION

At Millers Oils, we pride ourselves on delivering industry-leading technical support. Our expert team is available in-house, by phone, or via email to provide fast, reliable guidance, whether you need help choosing the right product or resolving a technical query. With Millers Oils, expert advice is always within reach.

STRATEGIC PARTNERSHIPS

Millers Oils drives excellence through strategic collaboration and technical innovation. We partner with industry bodies, OEMs and distributors across the globe to deliver high-performance lubrication solutions tailored to the demands of industrial operations. Our approach is rooted in mutual growth, operational efficiency, and continuous innovation.

PROVEN PERFORMANCE

Our championship-grade lubricants, trusted by motorsport winners utilise the same technology to power industrial machinery with enhanced thermal stability, reduced wear, and lower energy losses. Every formulation is engineered with the same rigour that wins championships — because whether you're on the track or the factory floor, performance matters.
