ABOUT MILLERS OILS

Millers Oils is a leading manufacturer and independent blender of oils and lubricants, operating since 1887 in Brighouse, West Yorkshire.

We pride ourselves on our award-winning innovation and our independence which allows maximum flexibility to meet our customers' needs.

Today's vehicles face tough conditions, stop-start driving, tighter emissions standards, extended service intervals, and modern fuel blends. Millers Oils treatments are engineered to meet these challenges head on. They work with your existing engine/gear oil and fuel, not against them, delivering measurable improvements in efficiency, performance, and engine life.

At Millers Oils, we understand that every vehicle faces unique challenges, from the daily demands of modern passenger cars to the heavy workloads of commercial fleets and the specialist needs of cherished classics. That's why we've developed a comprehensive range of fuel, engine oil, and driveline treatments designed to improve performance, protect vital components, and extend vehicle life. Whether it's restoring lost efficiency, preventing costly breakdowns, or safeguarding heritage engines against modern fuel chemistry, our treatments provide tailored solutions that deliver measurable results. This brochure brings together our full portfolio, Automotive, Motorsport, Heavy Duty, and Classic, so you can find the right treatment for every vehicle, every time.

ENGINE TREATMENTS

Keep your engine running cleaner, smoother, and longer with Millers Oils Engine Treatments. Designed to enhance performance and reduce wear, our advanced formulations work from the inside out tackling sludge, leaks, and inefficiencies. Whether you're looking to protect vital components or reduce oil consumption, Millers Oils has a treatment to keep your engine in peak condition.

Engine Flush - 5777

Added before an oil change, Engine Flush dissolves harmful deposits and sludge that build up over time. This ensures your fresh oil flows freely and provides maximum protection. Available in: 250ML

Key Benefits

- Removes varnish, sludge and insoluble deposits safely
- Frees sticking piston rings, hydraulic lifters and VVT (variable valve timing) systems
- Neutralises crankcase acids that accelerate wear
- Protects against metal-to-metal contact during the oil drain
- Improves fuel economy and engine responsiveness post-service

Stop Leak - 5619

Over time, seals and gaskets can harden, causing oil leaks that stain driveways, increase oil consumption, and in severe cases, damage the engine. Stop Leak helps to fix the seals and reduces oil leaks. Available in: 250ML

Key Benefits

- Reduces oil leaks from seals and gaskets
- Conditions rubber components for longer life
- Cuts oil consumption and exhaust smoke
- Helps avoid costly repairs or rebuilds

OUR FLAGSHIP FUEL TREATMENT

Petrol Power ECOMAX - 6205 (500ml) - 6207 (250ml)

Our flagship multi-functional additive, combining detergents with an octane boost for long-term cleanliness and performance. Available in: 250ML One Shot | 500ML Multishot

Key Benefits

- Raises octane rating by up to 3 numbers
- Maintains injectors health and carburettor jets "as new."
- Improves fuel efficiency and combustion stability
- E5/E10 Ethanol protection

Diesel Power ECOMAX - 6204 (500ml) - 6206 (250ml)

The diesel counterpart to Petrol Power ECOMAX, combining detergency, cetane improvement, and lubricity enhancement. Available in: 250ML One Shot | 500ML Multishot

Key Benefits

- Raises cetane rating by up to 5 numbers for faster, cleaner combustion
- Improves cold starting and engine smoothness
- Cleans injectors for sustained and reliable power and economy
- Provides additional lubricity to protect high-pressure fuel pumps
- Cuts visible smoke, soot and unburnt hydrocarbons

FUEL SYSTEM & OIL TREATMENTS

Millers Oils Fuel System Treatments are engineered to clean, protect, and optimise every part of your vehicle's fuel system. From injectors to particulate filters, our advanced additives restore lost efficiency, improve combustion, and reduce emissions. Whether you drive petrol or diesel, regular use helps maintain peak performance, reliability, and fuel economy, keeping your engine running cleaner for longer.

Petrol Injector Cleaner - 7628

Modern injectors operate at extremely fine tolerances. Even slight fouling can disrupt spray patterns, leading to poor combustion. This one-shot treatment restores injector performance. Available in: 250ML

Key Benefits

- Cleans injector tips and restores spray patterns
- Improves throttle response, idle stability, and acceleration
- Reduces emissions of hydrocarbons and CO2
- Suitable for direct and port injection systems

Diesel Injector Cleaner - 7627

Diesel systems are prone to lacquering, carbon build-up and sticking injectors. This maximum-strength cleaner restores performance. Available in: 250ML

Key Benefits

- Restores lost power and economy
- Reduces smoke and NOx emissions
- Improves torque and responsiveness
- Prevents costly injector replacements

Diesel Particulate Filter (DPF) Cleaner & Regenerator - 7795

DPFs are essential for emissions compliance but can become blocked by soot, especially on vehicles used for short journeys. This treatment restores function without costly strip-downs. Available in: 250ML

Key Benefits

- Lowers regeneration temperature, burning off soot faster
- Prevents premature DPF failure and expensive replacement
- Restores lost power and optimises fuel economy

IT Flushing Oil - 5437

Designed to safely remove sludge and deposits, it prepares your engine for fresh oil and helps maintain long-term performance. Available in: 1L | 5L

Key Benefits

- Helps prevent costly repairs by maintaining a cleaner, healthier engine
- Dissolves sludge and deposits to improve engine efficiency and reduce wear
- Ensures optimal lubrication for smoother engine operation

CLASSIC TREATMENTS

Millers Oils Classic Treatments use modern additive technology designed specifically for heritage and classic engine, cleaning, protecting, and preserving vital components while respecting original materials and performance.

VSPe Power Plus - 7916 (250ml), 7917 (500ml)
All in one fuel treatment providing ethanol protection, lead replacement and an octane improver that adds up to two octane numbers (20 points) to unleaded petrol. Recommended for all classic engines previously requiring leaded fuel and now running on E5 or E10 unleaded petrol.
Available in: 250ML One Shot | 500ML Multishot

- Key Benefits**
- Octane enhancement of up to 2 octane numbers (20 points)
 - Prevents detonation, hot spots & running on
 - Prevents fuel system corrosion and helps protect components
 - Carburettor anti-icing formula

Tank Safe - 7919
Over time, fuel systems can suffer from contamination caused by water, corrosion, and microbial growth inside the tank. This can lead to blocked filters, poor engine performance, fuel degradation, and costly repairs. Tank Safe Treatment helps protect the entire fuel system by controlling contamination and keeping fuel stable.
Available in: 250ML

- Key Benefits**
- Protects fuel tanks against corrosion and microbial growth
 - Helps prevent fuel degradation and sludge formation
 - Improves fuel cleanliness for reliable engine performance
 - Suitable for long-term fuel storage and lay-up protection

DRIVELINE TREATMENTS

Designed to protect and enhance the performance of gearboxes, differentials, and axles. Our advanced formulations reduce friction, improve smoothness, and extend component life, ensuring reliable operation and maximum efficiency.

Driveline Flush* - 8366
Deposits can accumulate in gearboxes, differentials and axles. Driveline Flush removes contaminants to prepare components for fresh fluid.
Available in: 500ML

- Key Benefits**
- Helps fresh oil perform at maximum efficiency
 - Extends service life of gears, bearings, and seals

**Driveline flush cannot be used in dual clutch (DCT-DSG) or continuously variable transmissions (CVT) applications.*

HEAVY DUTY TREATMENTS

Built for demanding conditions, Millers Oils Heavy Duty Treatments deliver superior protection and performance for commercial and industrial engines. They minimise wear, combat deposits, and help maintain peak efficiency under the toughest workloads.

Diesel Power ECOMAX HD - 6204
Commercial vehicles, agricultural machinery, buses, and construction equipment operate under severe loads and extended duty cycles. Millers Oils heavy-duty treatments are designed to reduce downtime, improve fuel economy, and keep fleets compliant.
Available in: 1L | 5L | 25L

- Key Benefits**
- Specifically blended for high-tank volumes.
 - Raises cetane for improved combustion efficiency.
 - Reduces black smoke, fuel consumption

MOTORSPORT TREATMENTS

Developed through years of racing expertise, Millers Oils Motorsport Treatments deliver ultimate performance and protection under extreme conditions. Formulated to reduce friction, enhance power, and ensure reliability, they give competitors the winning edge on track and stage.

CVL - 5587
An advanced competition fuel additive for maximum power and protection in high-performance engines. Formulated to deliver race-grade results from standard pump fuel.
Available in: 250ML

- Key Benefits**
- Protects against detonation and pre-ignition
 - Provides valve seat protection for older engines

CVL Extra - 5792
A competition valve lubricant and an octane booster. Enhance the protection against valve seat recession. Providing flame control.
Available in: 500ML

- Key Benefits**
- Boost octane up to 4 numbers
 - Protect against valve seat recession
 - Protect against corrosive effect of ethanol

Extra Cool - 5547
A high-performance coolant enhancer designed to reduce engine temperatures under extreme racing conditions. Keeps engines running cooler, safer, and more efficiently.
Available in: 250ML

- Key Benefits**
- Lowers running temperatures and prevents overheating
 - Improves heat transfer for consistent performance
 - Provides corrosion protection for alloy and mixed-metal systems

EPP EMISSION PERFORMANCE PROGRAMME

The Millers Oils Emission Performance Programme (EPP) is a comprehensive service solution designed for professional workshops and garages. Combining our advanced oil and fuel treatments, the EPP delivers a complete clean-up of critical engine and lubrication systems, restoring performance, improving fuel efficiency, and reducing harmful emissions. Each product in the range targets a specific area of the engine to optimise combustion, protect key components, and help vehicles consistently meet emissions standards. With proven results and guaranteed MOT emission compliance, the EPP enables workshops to offer customers a cleaner, smoother, and more efficient drive every time.

Key Benefits

- Guarantee to pass the emissions element of MOT testing
- Improves MPG and reduces running costs
- Restores lost performance for a smoother drive
- Extends life of catalytic converters and EGR systems

ENGINE FLUSH

Oil based flush with advanced additives which cleans oil ways.

Benefits:

- Safely cleans lacquer and varnish, dissolves sludge and insoluble deposits
- Frees sticking VVT systems and piston rings
- Ensures oil flow to critical moving parts
- By providing anti wear protection it maintains and protects the engine

PETROL SYSTEM CLEAN & PROTECT

An all in one petrol fuel treatment for use in all petrol vehicles (including Hybrids), with or without PPF.

Benefits:

- Improves fuel economy
- Increases power
- Reduces emissions
- Cleans the fuel system

PPF TURBO AND EXHAUST CLEANER

A one-shot petrol additive that cleans petrol particulate filters (PPFs) and the turbo and exhaust system.

Benefits:

- Removes trapped soot particles
- Provides optimum fuel economy, reduction in emissions and restoring of engine power

PETROL INJECTOR CLEANER

Maximum strength cleaning agent to remove deposits from petrol fuel injection systems.

Benefits:

- Restores vehicle power and acceleration
- Reduces exhaust emissions
- Cleans the fuel injection system
- Increases fuel economy
- Emissions control equipment (catalysts) unaffected by treatment

DIESEL SYSTEM CLEAN & PROTECT

An all in one diesel fuel treatment for use in all diesel vehicles (including Hybrids), with or without DPF.

Benefits:

- Enhances combustion efficiency and engine cleanliness
- Contains detergents and lubricity enhancers
- Improves fuel economy
- Increases vehicle power and restores lost power
- Reduces emissions
- Cleans injectors
- Adds up to 4 cetane numbers

DPF TURBO AND EXHAUST CLEANER

A one-shot diesel additive that cleans diesel particulate filters (DPFs) and turbo and exhaust system.

Benefits:

- Assists the removal of trapped soot particles by allowing the DPF to fully regenerate
- Provides optimum fuel economy, reduction in emissions and restoring of engine power

DIESEL INJECTOR CLEANER

Maximum strength cleaning agent to remove deposits from diesel fuel injection systems.

Benefits:

- Cleans and removes deposits from diesel fuel injection systems
- Restores power and acceleration
- Reduces exhaust emissions
- Increases fuel economy

DIESEL FILTER PRIMER

A product to be used for every service where a fuel filter is replaced.

Benefits:

- Cleans the filter housing and fuel system
- Quickens the process of changing a filter saving time on a service
- Eliminates air getting into the diesel system reducing diesel knock

COMPREHENSIVE TECHNICAL SUPPORT

At Millers Oils, we pride ourselves on delivering industry-leading technical support. Our expert team is available in-house, by phone, or via email to provide fast, reliable guidance, whether you need help choosing the right product or resolving a technical query. With Millers Oils, expert advice is always within reach.

VISION OIL ANALYSIS

PRECISION IN EVERY DROP

At Millers Oils, we believe in the power of proactive maintenance. Our Oil Sampling Kits are designed to provide garages with invaluable insights into the condition of their customers' engines. By regularly analysing oil samples, garages can detect potential issues before they escalate, ensuring optimal performance and longevity for every vehicle.

Each kit includes an easy-to-use sampling bottle and clear instructions, allowing for a straightforward collection process. The results are analysed by our expert team, providing detailed reports that highlight the health of the engine and recommend necessary actions. You can offer your customers peace of mind, knowing that their engines are protected and performing at their best.

WHICH OIL?

Millers Oils **WHICH OIL?** tool is your go-to solution when you need quick, accurate product recommendations. Just head to our website and enter a vehicle registration or select the make and model, and you'll instantly see all the suitable Millers Oils products for that vehicle.

WHICH OIL? takes the guesswork out of oil selection, so you can get it right, every time.
